Part #1612 - Replaces old style valves on 9000 series (5/1/97-1/5/99) and 9800 series (7/1/97-2/20/99). This valve has been improved for optimum performance. Consult TSB 99-16-02 (7/99).

NOTE: If the vehicle is not equipped with APADS, the relay should be replaced with Part #1269.

*TECH TIP: #1327 and #1328

Modification required. O.E. Models equipped w/shutters have a 3 terminal thermostatic switch which turns on the fan when the A/C is engaged. This switch has been discontinued, and is replaced with a 2 terminal switch. A high pressure switch (P/N #1480) must also be installed on the high side of the system, with lead wired to the fan clutch circuit in order to operate fan & shutters. This may require the use of a charging port/hose splicer in order to mount the pressure switch. If installed into high pressure hose (size 13/32") use P/N #4849. If installed into liquid hose (size 5/16") use P/N #4855.

TXV (see EXPANSION VALVES - ORIFICE TUBES)

* NOTE: O.E. #'s 18-03093 and 18-02915 have been replaced by Peterbilt O.E. #'s 23-12752 (for all applications exc. Cat. ATAAC eng.) and #23-12753 (w/Cat. ATAAC eng.). These replacement O.E. condensers from the factory (dealer) are supplied as retrofit kits and are taller in height and contain all required brackets, bushings, etc. to complete the installation. For a replacement condenser only to replace the newer (taller) model, use P/N # 6216 (Kit # 23-12752) and 04-1408 (Kit # 23-12753). Please note that #6216 and #6217 are the replacement condenser coils only, and are not complete retrofit kits with brackets, etc.
